OPERATING INSTRUCTIONS

1. Fully extend cord, and then plug into any 110-125V, 2 conductor outlet.

Note: This product has a polarized attachment plug (one blade is wider than the other). As a safety feature, this plug will fit in a polarized outlet only one way. If the plug does not fit fully in the outlet, reverse the plug. If it still does not fit, contact a qualified electrician. Never use with an extension cord unless the plug can be fully inserted. Do not attempt to defeat this safety feature

2. Depress switch in the handle to turn the light on/off.
3. When attaching the light to the vehicle please make sure that the light is firmly attached and won't fall or scratch the vehicle.
4. Once the light is properly attached it can be rotated to the best position to cast the most light to the desired location by simply rotating the light. When you rotate the light you will hear the clicking of the ratchets which will hold your light in the desired position.

BULB REPLACEMENT INSTRUCTIONS

1. Remove power supply plug from outlet.
2. On the handle **WITHOUT THE ON/OFF SWITCH**, unscrew the six screws from the handle.
3. Carefully pull the two sections of the handle apart. This will expose the wiring and the bulb socket.
3. Carefully ease the bulb socket out of the clear lens tube. Then unplug the bulb. Take care not to pull the wiring out of the socket.
4. Once the bulb is removed from the socket, simply pull the bulb straight out of the clear lens tube.
5. Replace bulb and reassemble.
